## FileNet P8 Platform

A unified platform for enterprise content management (ECM)

### Overview

IBM® FileNet® P8 Platform is a next-generation, unified enterprise foundation for the integrated FileNet P8 products. It combines the enterprise content management reference architecture with comprehensive business process management and compliance capabilities. FileNet P8 addresses the most demanding compliance, content and process management needs for your entire organization. It is a key element in creating an agile, adaptable ECM environment necessary to support a dynamic organization that must respond quickly to change. Agile ECM solutions using IBM technologies bring together capabilities for process management, content management, regulatory compliance and legal discovery. These flexible, extensible solutions and the ability to leverage these capabilities in an integrated environment can help you align key functions to your challenges and opportunities.

It includes a comprehensive set of content and process management business services that can be consumed and deployed in a service-oriented architecture. It also includes multilingual system capabilities for decentralized, federated system architectures, Advanced Security Services, comprehensive auditing and a standards-based authentication framework.

The platform supports flexible API for Java™, Microsoft® .NET® and XML Web services application development for a rich and interactive user experience that can be easily customized. It also supports Enterprise System Management tools, enterprise scalability, and flexible system deployment in clustered and highly available environments.

The core of the platform is provided by: [FileNet Content Manager](#) [FileNet Business Process Manager](#) [InfoSphere Enterprise Records](#) (formerly named [FileNet Records Manager](#))
